Lubricants Guide

Mega-lab’s outstanding line of specialty lubricants are formulated using the latest science and premium quality ingredients providing each user with leading edge lubrication.

Each mega-lab product reflects our continuous commitment to the latest technology, the highest quality and the preservation of our environment.
SPECIALTY LUBRICANTS

GEAR/CHAIN & CABLE

LUBRIFLEX™ (A)
Penetrates, lubricates and provides continuous protection for cables, chains and wire ropes. Temperature, pressure and wear resistant. Does not break down, even under conditions of water, salt or chemical exposure. Maintains cable and wire rope flexibility. Leaves light grease-like coating to protect against rust and corrosion.

LUBRIMESH™ (A)
Penetrates, lubricates and protects all open gears. Stringing action following each mesh provides continuous and automatic relubrication of gears. Contains “moly” to provide extended temperature and pressure range making it particularly well suited for use where extreme operating or weather conditions are encountered.

FOOD GRADE LUBRICANTS

CFG Grease
A superb clear multi-purpose high performance food grade lubricating grease providing maximum heat and moisture resistance for use in the food and beverage industry. Excellent for use on all food and beverage processing machinery. Proven superior wherever food grade lubrication requiring a high degree of water and chemical resistance or extreme temperature is encountered.

FG GREASE
A superb clear multi-purpose high performance food grade replacement grease which is especially effective in areas of extreme pressure. It is a non-staining, white, non-toxic, aluminium complex grease used in food processing and similar type operations.

ANTI-SEIZE COMPOUNDS

ASC (A/Brush Top Container)
A copper/nickel based anti-seize compound. Able to withstand extreme temperature ranges (-100° to +2,650° F), is completely weatherproof and corrosion resistant.

ASN (A/Brush Top Container)
A nickel based anti-seize compound. Able to withstand extreme temperature ranges (-100° to +2,650° F), is completely weatherproof and corrosion resistant.

CUTTING & TAPPING

CTF (A)
Cutting and tapping fluid. A unique combination of lubricants and coolants used to reduce friction and disperse heat build-up during cutting, drilling, boring or tapping operations.

BELT DRESSING

MICROTAC™ (A)
Quick, easy to use answer to squealing, slipping belts of all descriptions. Extends belt life and provides positive grip even in wet outdoor conditions. Won’t glaze or collect dirt.

Every mega-lab lubricant provides maximum benefits in the ongoing battle against wear, friction and corrosion in all types of industrial, institutional, agricultural, commercial and food processing environments.
**LUBRICATING OILS**

**Compressor Oils**

**CO 10W50**
Polymer-fortified multi-grade (10W50) compressor oil designed for both rotary and reciprocal compressors.

**Hydraulic Oils**

**HO 10W20S**
Multi-viscosity hydraulic oil. Used in hydraulic systems and turbines such as those found in industrial plants, bottling companies, farms, construction firms, municipalities and food processing operations.

**Gear Oils**

**GO 80W90 / 85W140**
Multi-grade polymer fortified gear lubricant. An all weather gear oil used to meet the most demanding requirements of enclosed gear systems. Is safe on bronze gears and bearings.

**Specialized Release Agents**

**RE-LEES™**
Water based surface safe barrier coating which eliminates adherence and subsequent build-ups of glue/resin on gluing equipment in lamination, furniture and plywood operations, paper converting, carton and packaging lines. Provides light silicone-free surface lubrication for saw tables, slideways and other production type equipment. Prevents surface bonding of paints/coatings on spray booths and associated equipment, water walls and fume systems. Easy build-up removal via scraper, squeegee or hot water flushing.

**Mega-Lab has assembled some of our most popular products in an easy order**

**Multi-LUBE Handy Pack**

Contains:
- 3 only LUBITOL™
- 2 only SUPER-SIL
- 2 only TEFI-LUBE
- 1 only LUBRIFLEX™
- 1 only DRI-LUBE
- 1 only MICROLUBE™
- 1 only ASC
- 1 only MICRO Tac™

**OR**

Mix and Match to your own requirements (must be full case of 12 cans)
